Profile

Computer Science and AI student at Loughborough University with practical experience developing software systems using Python and Java. Strong foundation in object-oriented programming, algorithms and databases, with interests in software development, data and AI. Seeking a technology placement to apply and further develop technical problem-solving skills in a professional environment.

Education

Loughborough University — Loughborough, UK
MSci Computer Science and Artificial Intelligence — *2025 – Present*

- **Relevant Modules:** Software Engineering, Object-Oriented Programming, Algorithms, Databases, Artificial Intelligence, Computer Systems, Operating Systems, Networks and Security

Harris Academy Merton — London, UK
A Levels: IT, Mathematics and Physics – A A C* — *2023 – 2025*

Technical Projects

Game Management System | *Python, pandas, Matplotlib, NumPy*

- Developed an interactive Python game management system supporting rentals, returns, bookings, ratings and customer comments.
- Implemented extensive validation and file-handling logic to maintain and process data stored across text files.
- Developed analytical functionality to identify game popularity and recommend titles for removal or future purchasing decisions.

Board Game Management System | *Java*

- Developed an object-oriented system allowing users to search for board games, assess compatibility and process game purchases.
- Applied OOP concepts including interfaces, enums, generalisation and specialisation to model different game categories and behaviours.

Lumina | *Ongoing Personal Project*

- Developing a learning-focused software platform designed to provide structured academic and faith-based study environments.
- Designed the application's core interface, navigation structure and study journey workflow, with material-upload and AI-assisted learning functionality planned for continued development.

Experience

Event Steward — 2026 – Present
ALLIANCE MANAGEMENT — *UK*

- Patrolled festival and event areas to support public safety, monitor crowd movement and identify issues requiring escalation.
- Assisted with traffic management around event sites, helping direct vehicles and pedestrians safely through busy areas.
- Provided clear information and directions to members of the public, helping attendees locate entrances, facilities and event areas efficiently.

Teaching Assistant — July 2024
ABBOTSBURY PRIMARY SCHOOL — *UK*

- Supported the lead teacher in delivering classroom activities and assisting pupils with differing academic and support needs.
- Supervised pupils during breaks, activities and school events while helping maintain a safe and organised environment.

Sports Prefect — 2021 – 2022
MEA MATER ELIZABETH HIGH SCHOOL — *NIGERIA*

- Coordinated sporting activities and supported the organisation of the school's annual inter-house sports event alongside staff and student leaders.

Technical Skills

Programming Languages: Python, Java, C
Databases: SQL, Relational Databases
Libraries: pandas, NumPy, Matplotlib
Programming Concepts: Object-Oriented Programming, Algorithms
Developer Tools: Git, GitHub, Google Colab, Eclipse, Cursor
